SUMMARY

Dedicated SOC Analyst skilled in real-time threat detection, security alert investigation, and log analysis. Focused on fast incident containment, clear report writing, and improving overall system defense.

TECHNICAL SKILLS

- **SIEM & Monitoring:** Splunk (SPL, Dashboards, Telemetry), Wazuh (FIM, Custom Rules, Active Response), Suricata (NIDS Integration)
- **SOAR & Automation:** Shuffle SOAR (Webhook Workflows, Automated Threat Enrichment)
- **Incident Triage & Response:** Log Analysis, Root Cause Analysis, NIST SP 800-61, MITRE ATT&CK.
- **Vulnerability & Assessment:** Nmap, Nessus, Risk Prioritization, CVSS Scoring
- **Frameworks & Compliance:** ISO/IEC 27001 (ISMS Gap Analysis), PCI DSS Compliance Mapping

PROJECT

Enterprise Threat Detection & Automated Incident Response (Wazuh, Splunk)

- **Custom Detection Engineering:** Built high-severity Wazuh SIEM detection rules (Level 12) correlating Windows (Event ID 4625) and Linux authentication logs (auth.log) to identify high-velocity brute-force attempts.
- **Automated Host Containment:** Configured Wazuh Active Response scripts (firewall-drop) to dynamically block malicious IPs on host firewalls (iptables) upon threshold breach.
- **Splunk Telemetry & Geo-Location Analysis:** Engineered a Splunk SSH Dashboard utilizing custom SPL queries to analyze 1,200+ events, track failed vs. successful logins, pinpoint targeted accounts (root), and map attacker origin IPs via geo-location visualization.

EXPERIENCE

SOC Threat Intelligence & Detection Intern | Resecurity

November 2025 - January 2026

- Deployed and configured **Wazuh agents** across endpoint nodes to enable centralized security log collection and host telemetry tracking.
- Analyzed system authentication logs (/var/log/auth.log & Windows Security Events) to detect brute-force activity and unauthorized escalation attempts.

GRC / Compliance Analyst Intern | Miraal Cybersecurity

- Conducted internal audits and gap analyses against ISO/IEC 27001 standards to evaluate enterprise Information Security Management System (ISMS) posture. Documented control deficiencies and prepared compliance mapping reports to align operational practices with international security benchmarks.

SOC & SIEM Operations Intern | National Centre for Cybersecurity (NCCS) - NEDUET

November 2024 - February 2025

- Executed vulnerability assessment workflows using **Nessus** and **Nmap**, cross-referencing findings with Wazuh vulnerability detection modules.

CERTIFICATIONS

ISO/IEC 27001:2022 – Miraal Cybersecurity, HCIA - Datacom – Huawei, Web Application Penetration Testing, OWASP Top 10 – Cybrary

EDUCATION

Bachelor of Computer Science with Specialization in Cybersecurity

NED University of Engineering and Technology, Karachi

2022 - 2026

Intermediate, Pre-Engineering

SIR SYED Govt Girls College Nazimabad November, Karachi

2020 - 2022

Matriculation, Science.

Trueman School System, Karachi

2018 - 2020
